

SmartReactors

Our Alignment with

Sustainable Enterprise and Social Value

SDG 9 Innovation

Solid IP and a mission to develop and offer high performance biocompatible coating solutions for a broad range of medical device applications.

SDG 4 Quality Education

Smart Reactors provide training to MedTech clients and continue to educate customers on the advantages of our technology. We have a wealth of clinical and industrial knowledge and work with higher education, providing student experience placements.

SDG 12 Responsible Production and Waste Management

Improving the performance and durability of medical devices, we maintain strict monitoring of materials use. Coupled with a conscious and responsible production process, the use of nano technology allows to minimise waste.

SDG 17 Partnerships for the Goals

As a company, we are always looking to create effective partnerships in alignment with our values and exchange knowledge with others. We continue to invest in technologies, tools and solutions that will optimise our service delivery, reduce waste and mitigate our environmental.
